Middle School

The vision for our Middle School at Nursery Road is to provide a program that supports the development of independence, communication and Personal and Social Capabilities required to be an active member of the community. Middle School students access the Australian Curriculum through individually tailored curriculum plans. This includes English, Math, Health and Physical Education and Music. As part of a balanced literacy approach the students participate in literacy streaming groups based on individual student data for literacy and communication. Communication and Personal and Social capabilities are embedded across all activities and areas of the Middle School curriculum. Project Based Learning combined with outdoor learning offers our students an alternative to the classroom and engages them in authentic learning experiences including shaping the project collaboratively with their peers through a specific focus on planning, problem solving and student voice and choice.
