Data Collection  
QCIA Learning Goals

## Senior School

The vision of our Senior School at Nursery Road is to provide a planned pathway for the smooth transition of our young people towards meaningful post school options. Social competence and life skills are developed and embedded in everyday learning to promote the development of the independence skills required to be active member of their community. Functional literacy, numeracy and communication skills are a key focus in the Senior School. Our young people are provided with the tools specific to their individual needs to engage with a range of people in their post school lives. Access to a variety of post school options in the community to develop networks and investigate placement options play a crucial role in aligning the needs of young people with the best fit for their future.
